-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action: .

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 13, 15, 17 – 19, 21 – 25 are rejected under 35 U.S.C. 102(e) as being anticipated by Ahmad (US Pub. No. 2003/0190012).

Ahmad has a debris mitigation system for a lithographic apparatus, see paragraphs 0005, 00322). Since the system is designed to be used in a lithographic apparatus, the illumination system, the support structure, the substrate support and the projection system are implicit. The debris mitigation system comprises a vacuum pump (4), electrodes (2, 26, 27), and a gas feed device (5), gas outlets (53). The mitigation system generates additional particles to deflect charged particles. The pump and electrodes cause the additional particles to be deflected in a direction different from the debris particles. Claims 13, 15, 18, 25

The mitigation system forms part of the radiation source (1) – claim 19

Multiple electron units may to used, these would generate a supersonic flow; using radio frequency would be a variant of the invention that those skilled in the art would know and which would be among the variants implied by paragraph 0049. The gas and

electrons generate a plasma. See Fig. 3, related text and paragraph 0049 - claim 21-25

***Allowable Subject Matter***

3. Claims 1 – 7, 9 and 10 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter: The prior art does not suggest generating a additional particles using only the electrodes.
